Professional Summary

Associate Consultant and Java Developer specializing in GRC platform configuration and AI-driven backend development, with hands-on experience in Java, Spring Boot, SQL, and Vue.js. Builds portlets, dashboards, forms, and workflows on SAI360 alongside independent Spring Boot / AI agent projects, with a strong foundation in OOP, DSA, and database design.

Professional Experience

Associate Consultant – *ADAPS, Hyderabad* Sep 2026 – Present

- Develop and configure solutions on the SAI360 GRC (Governance, Risk & Compliance) platform for client organizations, translating business requirements into working platform features.
- Build custom portlets and dashboards using Vue.js and SQL data sources for clear risk and compliance visibility.
- Design and develop forms and business workflows within SAI360 to streamline client risk and compliance processes.
- Create and configure risk and control assessments, working with functional and technical teams on client requirements.

Associate Consultant Intern – *ADAPS, Hyderabad* Dec 2025 – Aug 2026

- Built responsive UI components using Vue.js, Vuex, and Tailwind CSS, and wrote optimized SQL queries for data retrieval and reporting, while developing LeafCode, a course-selling web application.
- Transitioned into the GRC team and applied the same Vue.js and SQL skillset within SAI360, building portlets, dashboard views, and business workflows for client organizations.
- Completed client communication and interpersonal skills training as part of consulting onboarding.

Trainings & Certifications

Java & SQL Developer Training Program and Certification – *CVCORP, Hyderabad* Jun 2025 – Nov 2025

- Completed structured training and earned certification in Core Java, Advanced Java, SQL, and HTML/CSS, covering JDBC, OOP, Collections Framework, Exception Handling, and Multithreading through hands-on exercises.
- Built Java applications and strengthened problem-solving skills through technical assessments and coding practice.

Projects

TeachMe AI — AI Teaching Assistant Platform | *Spring Boot 3.2, Java 21, Vue 3, Tailwind CSS, Docker*

- Built a full-stack AI teaching assistant with a Spring Boot 3.2 / Java 21 backend implementing a 9-step AI agent pipeline powered by Ollama (qwen3), paired with a Vue 3 and Tailwind CSS frontend.
- Grew to roughly 189 files, 17,900+ lines of code, and around 183 backend test methods, with Docker setup and documentation.

LeafCode — Course Selling Platform | *Vue.js, Vuex, Tailwind CSS, SQL*

- Built a responsive online learning platform for browsing and purchasing programming courses using Vue.js and Vuex, with reusable UI components and dynamic course filtering.
- Integrated SQL-backed course data and optimized frontend state management for a smoother, faster user experience.

Habit Tracker Application | *Java*

- Designed and built a console-based habit tracking application in Java from scratch, applying core Object-Oriented Programming principles and modular class design.
- Implemented user authentication, habit management, and file-based persistent storage using the Java Collections Framework and custom exception handling.

Technical Skills

- **Languages:** Java, JavaScript, SQL
- **Backend:** Spring Boot, JDBC, REST APIs, Multithreading
- **Frontend:** Vue.js (Options API), Vue 3, Vuex, Tailwind CSS, HTML5, CSS3, Vite
- **GRC Platform:** SAI360 (portlets, dashboards, forms, workflows, risk & control assessments)
- **Databases:** MySQL, PostgreSQL
- **Tools:** Git, GitHub, Docker, VS Code, Eclipse, IntelliJ
- **Concepts:** OOP, DSA, Collections Framework, Exception Handling, Agile, Responsive Design

Education

Malla Reddy Institute of Technology and Science Hyderabad, India
Bachelor of Technology in Electronics and Communication Engineering CGPA: 7.4/10 · 2024
